

LRRB Research Projects Conference Presentation Planning

Part of the LRRB Outreach Committee’s mission is to have presentations made on recent LRRB research implementation topics at local conferences.

The Outreach Committee would like the LRRB’s assistance with identifying “hot” projects to promote at future conferences. This template was developed as a guide for the LRRB to use at Quarterly Meetings to review completed projects, determine which projects to “market”, identify appropriate audience (conference) and initiate the planning within the necessary timeframe.

The purpose of these presentations is to:

- Promote awareness of the LRRB
- Engage a larger audience

The following conferences have been identified as potential venues:

| CONFERENCE NAME | SCHEDULED DATE (MONTH EACH YEAR) | PLANNING FOR PRESENTATIONS (9 MONTHS PRIOR TO CONFERENCE) | LIAISON TO PLANNING COMMITTEE |
|----------------------------------|-------------------------------------|--|-------------------------------------|
| CEAM | January | April | SALT |
| MCEA | January/July | April/October | SALT |
| Pavement | February | May | SALT |
| Geotechnical | February | May | TBD |
| ATTSA “How-to” (<i>safety</i>) | March | June | Rick West? |
| Maintenance Expo | April/October | July/January | Sandy McCully? |
| MPWA | May/November | August/February | T. Colbert |
| CTS | May | August | B. Johns |
| LMC | June | September | TBD |
| TZD | October | January | CTS |
| Stormwater | November | February | TBD |
| Bituminous | December | March | TBD |
| AMC | December | March | TBD |
| Concrete | December | March | TBD |

The LRRB Outreach committee would invite the LRRB to use this template as a standing document for use at all committee meetings, to discuss potential presentations to be submitted to the LRRB Outreach Committee chair (Julie Skallman).
